

Our Financial Policy

We understand that dental work can be expensive, so we will do everything possible to make the treatment you may need as affordable as possible.

We accept the following payment methods:

MasterCard, Visa, American Express, Discover card, and of course, cash and personal check.

We also offer CareCredit, a third party financing company that can only be used at a healthcare facility, (including veterinary offices that participate). If the outstanding balance is paid within 3 months, no interest is charged. If an outstanding balance is paid in more than three months, then interest is charged. If you are interested in CareCredit, see Terry for an application and more information. *We provide no internal financing.*

We accept most forms of insurance, and we will do all we can to accurately predict Insurance benefits, deductibles, co-payments, etc, but with current HPAAs restrictions, we are limited in how much information we can obtain. You will be responsible for any charges the insurance doesn't cover. We recommend that you understand your particular insurance policy.

All co-payments, deductibles, and non-covered charges are due at the first appointment.

For procedures that require several appointments, such as bridgework, partial and full dentures, and crowns and bridges over implants, co-payments, deductibles and non-covered charges are due and payable on the first appointment.

If a treatment plan is paid in full, with cash or check, a 5% discount is given. This discount does not apply to United HMO, and any Dental PPO or CareCredit.

If you have any questions, please ask one of the staff.
